

allPIXA SWIR Line Scan Cameras

State-of-the-art InGaAs sensor

The allPIXA SWIR is the first short-wave infrared (SWIR) linescan camera in Chromasens' allPIXA family. The state-of-the-art InGaAs sensor in a compact footprint allows its integration for multiple machine vision applications.

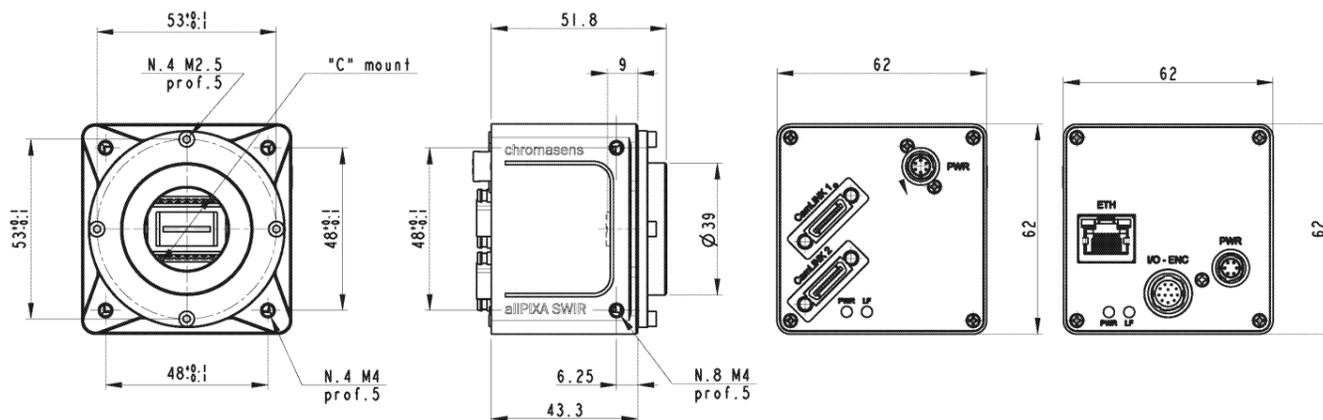

It offers an uncooled sensor with 1k resolution and 12.5 µm pixel size for high resolution, high sensitivity and a line rate of 40 kHz. GenICam compliant GigE Vision and CameraLink interfaces allow an easy integration into existing machine vision systems.
